

PRESS RELEASE

(Hoesbach/Germany, May 16, 2007)

ASC Registered by the International Civil Aviation Organization (ICAO)

Communications Recording Solutions Meet Strict Vendor-Neutral Standards for National and International Operations

Hoesbach/Germany, May 16, 2007 – ASC (www.asctelecom.com), a leading global provider of innovative solutions to record, analyze and evaluate communications, today announced its registration by the International Civil Aviation Organization (ICAO) as a supplier of communications recording solutions. ICAO's Technical Co-operation Program evaluates solutions for aviation security and use by airports in national and international operations.

Airports must record and archive all air traffic communications. Protection from liability is a crucial requirement, and one reason why ASC's products have been selected by airports all over the world. Now, registration by ICAO indicates these systems meet rigorous requirements and recommended practices.

Patrick Salg, Senior Export Manager of ASC, said, "We are pleased to meet ICAO's strict vendor-neutral standards. ASC is continually re-designing its products to maximize customer-centric, transparent operation, perhaps, one reason why they are so popular in markets facing critical situations such as airport safety."

All of ASC's registered equipment meets the requirements to record, archive and playback air-traffic communications in compliance with ICAO's Standards and Recommended Practices.

ASC's systems offer the highest data security because their redundant architecture minimizes the possibility of mechanical failure, and user-friendly, intuitive interfaces help the air-traffic controller focus on the situation at hand, when time is of the essence.

In addition, the reproduction of transmissions by ASC's recording solutions precisely indicates and corresponds to the temporal flow of any occurrence, and automatic backup ensures all communications will be preserved. These features assist in the reconstruction and analysis of dangerous incidents.

About ICAO

The ICAO, a specialized agency of the United Nations, was created on December 7, 1944, at the Convention on International Civil Aviation to achieve safe, secure and sustainable development of civil aviation through cooperation among member nations.

To implement this goal, ICAO provides advice on safety, security, environmental protection, efficiency, continuity and rule of law. It assists in the development and implementation of projects across the full spectrum of air transport, and promotes standardized codes to achieve operational safety, as specified in its Standards and Recommended Practices (SARPs).

About ASC

ASC is a leading global provider of innovative solutions to record, analyze and evaluate communications.

With ASC software, all multimedia interactions in contact centers, financial institutions and public safety organizations are documented and analyzed by intelligent speech and text evaluation methods.

ASC technology enables precise examination of business processes and provides the basis for decisions by supervisors and company executives. The content of communications becomes transparent, generates important information and indicates market trends.

By analyzing communication structure and content, the performance of employees may be evaluated to foster a continuous improvement process.

“Leadership in technology through innovation” is a guiding principle that perfectly describes ASC’s current scope of activities. Today, the company generates more than 50 percent of its revenues with innovative software solutions.

With subsidiaries in the United States, the United Kingdom, France, Switzerland and Singapore, and certified and powerful distribution partners, ASC’s ambitious projects span more than 60 countries. An export quota of almost 70 percent, together with its worldwide service network, makes ASC a powerful global player.

Global alliances, as well as integration and marketing-focused partnerships with leading telecommunication suppliers, ensure fast and easy implementation of ASC solutions in almost any environment.

ASC’s management, with its wealth of experience and its proven record of innovation, provides the knowledge, structure and financial resources required to develop trend-setting solutions. Every year, 18 to 20 percent of revenues are re-invested in research and development.
